

Data Archival for Dynamics ERP

Data management for users of Dynamics AX

The Ignify Data Archival solution provides data management capabilities to manage your Dynamics AX database.

Easy to implement with capabilities to archive data over a selected time period for the entire database, for selected companies, or for selected entities e.g. Quotes, Sales Order, Sales Invoices, Inventory Transfers, Production Orders. Supports custom tables and entities.

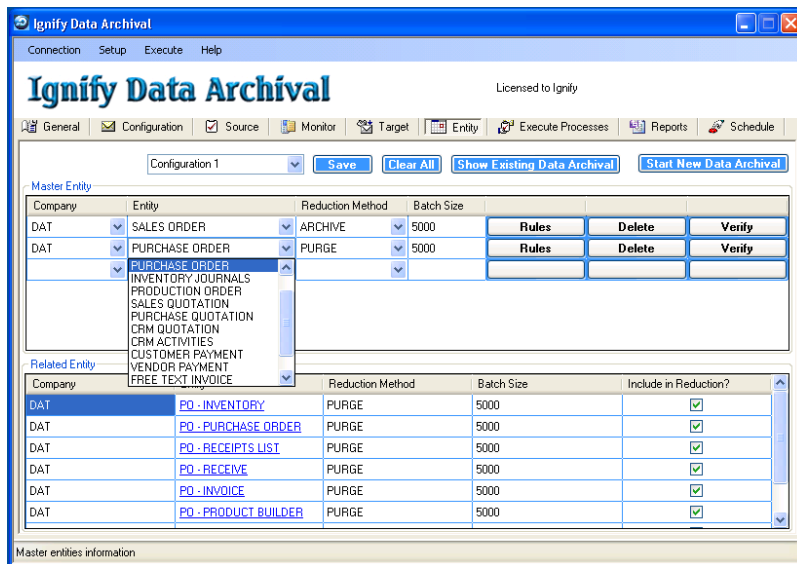

Figure: Run Data Archival by selected Dynamics AX entities. Select different reduction methods (e.g. Purge or Archive by entity) Setup different rules and configuration for different entities e.g. archive sales orders but purge quotes.
