**Asia:** Singapore    Bangkok    Manila    Pune    Bangalore    Hong Kong

Ignify's RAPID (Ready to Use and Proven Implementation Deliverable) provided industry specific accelerators to ensure customers can get the benefit of a pre-packaged and pre-configured solution that is specific to their vertical. The marine and offshore services industry is like no other. Large complex projects have to be estimated for with a high degree of accuracy and planning information has to be available at the most detailed level with a summary view to easily understand the project profitability. Expensive and high capital equipment is at play with high depreciation costs that needs to be allocated to projects to get true project profitability.

A Powerful and yet Simple ERP is needed to meet the industry-specific requirements of marine services providers. Furthermore, this platform must be highly integrated to promote efficient, scalable to accommodate growth and Agile to support new processes across an extended enterprise that includes a growing web of supplies and trade partners. The Ignify Marine and Offshore Services Template offers a streamlined and comprehensive way to obtain just such a platform by incorporating the specific requirement of the solar industry into the **Powerful, Simple and Agile Microsoft Dynamics AX 2012** ERP solution

## Template Overview

The Ignify Marine and Offshore Services template based on the Microsoft Dynamics AX ERP software is a pre-configured solution that has been specifically designed for companies in the business of servicing marine platforms such as oil rigs, marine wind farms, and sub-sea installations.
